ENVIRONMENTAL AND DEVELOPMENT ECONOMICS (S411006)

Prof. Giacomo DE GIORGI

Prof. Salvatore DI FALCO

6 crédits

Semestre : automne

Teaching language : English

Descriptif

This course explores the intersection of environmental and resource economics and development economics. Of special interest are issues related to rural environmental and development outcomes. The focus is on both the theoretical and empirical dimensions. The course is delivered by a combination of (8x3 hours) lectures and seminars. During the latter students will be requested to discuss some papers as well as prepare some presentations.

Assessment

Written exam
